

New York Governor Andrew Cuomo says the product is highly effective thanks to its 75% alcohol content.

Alcohol, while effective at killing germs, alcohol-based hand sanitizers can dry out your hands and have a sterile, alcohol-heavy scent. Alcohol based hand sanitizers only work while they are still wet on your hands, once dried it no longer protects you from germs and you will have to re-apply 100 times a day!

Zoono's advanced technology offers germ protection long after the product is applied by creating a protective shield on the surface it is applied to. This shield lasts 24 hours on skin, when natural shedding occurs.

1 Application of Zoono = 100 Applications of Traditional Hand Sanitizer!

The benefits of Zoono:

- ✓ Long lasting protection
- ✓ Kills 99.9% of germs on contact
- ✓ Less toxic than vitamin C*
- ✓ EPA Effective

NYS Clean will be made by Corcraft, the brand of products that are manufactured in correctional facilities throughout New York State. Alcohol in prison, ok did you know the effect of drinking hand sanitizer? The side effects from drinking hand sanitizer to get high can lead to memory loss, vision problems, diarrhea and damage to internal organs. Individuals that drink hand sanitizer can experience alcohol poisoning, just as they can with beer, wine or distilled liquor, which can lead to coma and death.
